We are excited about the new developments at Cim-Tek and hope you are as well. Below you will find some of the newest projects we have been working on. Please let us know if we can better serve you in any way, and enjoy our newsletter!

### DEF Filtration

Cim-Tek Filtration understands that diesel exhaust fluid or DEF is a key ingredient for allowing the selective catalytic reduction (SCR) system work to reduce emission pollutants such as NOx(nitrogen oxides). In response to the new 2010 truck system regulations for SCR systems, we have developed D.E.F.-TEK sub-micron filters for particulate removal from DEF fluid to ensure SCR systems function properly.

For more information, email [def@cim-tek.com](mailto:def@cim-tek.com)

### Hydroburn PSR

Hydroburn PSR is Cim-Tek Filtration's new and improved fuel additive formulated only for ethanol-blended gasoline in above and underground fuel storage tanks. With Hydroburn PSR, you will see a huge reduction in the cost of having the phase-separated fuel in the tank removed, cleaned and serviced. For example, if you have a 5,000 gallon storage tank with phase separation at tank bottom, you will only need 55 gallons (1 Drum) of Hydroburn PSR to reverse phase separation returning the blend back to its original specifications. Using Cim-Tek's Hydroburn PSR now makes it more economical to take care of the phase separation problems on site and faster as a result of the application process. **PROBLEM SOLVED!**

### Tank Sampler Kit

The new and improved **Cim-Tek Tank Sampler Kit** is a portable hand-operated vacuum pump device designed to determine fuel conditions present in fuel storage tanks.

Thank you for your business. We genuinely appreciate working with you and your company.

Sincerely,

Cim-Tek Filtration
