

# HYDROBURN PSR™

Patent Pending

**Phase Separation Reversal for Ethanol-Blended Fuel**  
55 Gallons Treats 5,000 Gallons of Fuel in Above/Below Ground Storage Tanks

# PHASE SEPARATION

## DETECT IT.

U.S. PATENT #4623560  
(original patent holder)

Bio-Tek® Alcohol Monitor to Detect Phase Separation

*We guarantee Hydroburn PSR™ to be compatible with all Cim-Tek® filters. (We cannot guarantee compatibility with other brands of filters.)*

## REVERSE IT.

PATENT PENDING

Hydroburn PSR™ 55 Gal. Drum for Reversing Phase Separated Bottom Layer

## PROFIT.

Sell the Ethanol-Blended Fuel and Eliminate Hazardous Material Waste Streams

**HYDROBURN PSR™** is Cim-Tek® Filtration's new and improved fuel additive formulated only for ethanol-blended gasoline in above and underground fuel storage tanks. With Hydroburn PSR, you will see a huge reduction in the cost of having the phase-separated fuel in the tank removed, cleaned and serviced. For example, if you have a 5000 gallon storage tank with phase separation at tank bottom, you will only need 55 gallons (1 Drum) of Hydroburn PSR to reverse phase separation returning the blend back to its original specifications. Using Cim-Tek's Hydroburn PSR now makes it more economical to take care of the phase separation problems on site and faster as a result of the application process. **PROBLEM SOLVED!**

REV. 03.25.09

# HYDROBURN<sup>PSR</sup><sup>TM</sup>

For Ethanol-Blended Fuel Only

**PHASE SEPARATION REVERSAL**  
FOR USE WITH UNDERGROUND & ABOVE  
GROUND TANKS CONTAINING ETHANOL-  
BLENDED FUEL

## ETHANOL-BLEND FUEL DETECTION & TESTING

### DETECT. PHASE SEPARATION DETECTION

**Bio-Tek® Alcohol Monitor** detects phase separation in ethanol-blended fuel up to E15. Bio-Tek Alcohol Monitors have microglass media for twice the life compared to filters using cellulose media.  
(Variety of sizes available)

### SAMPLE.

### PHASE SEPARATION SAMPLER

**Cim-Tek® Tank Sampler Kit** is a portable hand-operated vacuum pump device designed to determine fuel conditions present in fuel storage tanks.

**#60035** Wt. 8#

## ETHANOL-BLEND FUEL TREATMENT

### REVERSE. REVERSE PHASE SEPARATION (Patent Pending)

\* **HYDROBURN PSR 55 GALLON DRUM TREATS 5,000 GALLONS; 2 DRUMS TREAT 10,000 GALLONS, ETC.**

1. Determine the volume of ethanol-blended fuel in the tank.
2. Add Hydroburn PSR<sup>TM</sup> to ethanol-blended fuel.
3. Agitate.

- A.** Put 1/2 the Hydroburn PSR in an empty tanker truck. Pump the fuel out of the UST into the tanker. Pour the other 1/2 of the Hydroburn PSR into the UST. Dump the fuel back in to the UST. This provides sufficient agitation, or
- B.** Pour Hydroburn PSR into the tank. With a pump/motor unit, pump out of one end of the tank, pulling from bottom, and discharge the fuel into the other end of the tank. You must turn over the fuel at least three times.

\* Volume of Hydroburn PSR to use is 1% of total fuel volume.

**#60069** Wt. 410#

4. **SEE HOW IT WORKS!** <http://www.youtube.com/user/cimtek2009>

#### HYDROBURN PSR IS FOR USE IN ETHANOL-BLENDED GASOLINE ONLY!

Bio-based formula promotes more complete combustion for reduced emissions.

#### KEEP OUT OF REACH OF CHILDREN.

**CAUTION: HAZARDOUS, FLAMMABLE LIQUID.** Harmful or fatal if swallowed. Avoid contact with eyes or prolonged contact to skin. If swallowed call physician immediately. Avoid spillage on painted surfaces. KEEP LID TIGHTLY CLOSED.
