

NEW!

High Dirt-Holding Capacity

X-GLASS® spin-on filters

Maximum Working Pressure up to:
225 psi / 1551 kPa / 15.5 bar

Maximum ΔP: (differential pressure)
25 psid / 172 kPa / 1.7 bar

Flow Range up to:
40 gpm / 151 lpm

Application

- Systems requiring filtration with high dirt-holding capacity and fewer "change-outs"
- Particulate removal for industrial in-plant equipment, lube systems and return line hydraulic systems
- Compatible with lube oils, gear oils and most synthetic fluids

Filtration Ratios

X-Glass Microglass Media						
P/N	Thread	Length	Width	Working Pressure	$\beta_x=200$	Adaptor Series

Note: 1. Filters are not to be used with aviation applications. 2. Specifications are subject to change without notice.

Design Features

- **NEW!** X-Glass Microglass media designed with higher dirt-holding capacity over traditional microglass medias
- Equivalent to OEM filters
- Threads Available: 1"-12 or 1 1/2"-16
Additional Threads: 3/4"-16, 1"-12, 1 1/8"-16, 1 3/8"-12, 1 1/4"-12, 1 1/2"-16, 3/4"-14 BSP, 1 1/4"-11 BSP
- Lower pressure drop (Differential Pressure)

Benefits

- **NEW!** X-Glass Microglass media has high dirt-holding capacity for a longer filter life
- Fewer "change-outs" for less downtime and maintenance costs
- Protects equipment from system failure and expensive repairs
